### **LTC JUMONVILLE FILM PRODUCTION CLASS WRAPS "THE GLASS CHORD" TO EARN FIRST SCREEN CREDIT.**

New Roads, LA--August 22, 2006— LTC Jumonville Film Production Class successfully wrapped the short film "The Glass Chord" receiving screen credit as production crew members.

The film production class is the first of its kind in Point Coupee Parish. The short film marked the end of the 12-week program which introduced students to camera, lighting, audio, and screenwriting.

The program was funded at no cost to students by a federal grant under the auspices of the Louisiana Department of Labor which coordinated the efforts of Workforce Investment Board 20 in Pointe Coupee and surrounding parishes, Workforce Investment Board 21 in East Baton Rouge Parish, and the Louisiana Community and Technical College System to administer the grant at LTC- Jumonville Memorial Campus.

23 students received screen credit on the movie, making them eligible to apply to Homegrown Workforce Initiative (HGWI). HGWI is Emerald Bayou Studios in-house on-the-job training program committed to growing an indigenous film production workforce in Louisiana.

"The Glass Chord," filmed in and around New Roads and Pointe Coupee Parish, receiving a great deal of support from local businesses and residents.

The LTC-Jumonville Film Production Class and Emerald Bayou Studios would like to thank the following people for their support of the program and their generosity in helping to make the movie.

Secretary of Labor John Warner Smith and his staff including Benny Saucier, Girard Melancon and Kelly Ebey; Workforce Investment Board representatives Rory Hayden, A.C. Wilkinson, Sidney Longwell, Jacqueline Foster, Isaiah Marshall, Roland Bellizaire, Laressia Gaines, Veronica Will.
